Rise to Health: A National Coalition for Equity in Health Care brings together individuals and organizations to transform health care through coordinated and collective action.

Our vision is a transformed health care ecosystem where all people have the power, circumstances, and resources to achieve optimal health. We will:

Build
Build capacity, expand knowledge, and mobilize with concrete skills and tools to advance equity and racial justice in the health care ecosystem and in our communities.

Change
Influence and fundamentally change policy, payment systems, education, standards, and practices.

Transform
Sustainably change mindsets and narratives within health care around equity and racial justice.

Together, we can create a health care ecosystem that truly serves everyone.
